INTERNAL: Company Overview for Demo

Summary • Evidence • 3 Plays • Operating Blueprint (90 days) • Risks

Quick links

[Executive Summary](#) · [Executive Ask](#) · [Evidence](#) · [Prioritized Plays](#) · [Operating Blueprint](#) · [Top Risks](#) · [BM Snapshot](#)

Executive Summary

- Demo operates a global fleet with a distributed IT asset base (3,405 total assets, 34 sites), requiring robust lifecycle and coverage management.
- Current asset coverage is at 100% (3,405/3,405), with no uncovered assets reported; all assets are marked as excluded, indicating a need to clarify eligibility and coverage definitions. Lifecycle risk is
- present, with 94 assets reaching Last Date of Support (LDOS) in the next 12 months and 169 assets up for renewal in the next 90 days, concentrated at key sites (notably Southampton and Rostock).
- Run-rate IT spend is approximately \$3.8M annually, with no current attach opportunity identified; asset mix is heavily weighted toward wireless and enterprise switching architectures.
- Strategic focus: accelerate refresh/migration for aging assets, proactively manage renewals, and clarify asset eligibility to unlock attach and coverage growth.

What we're seeing: Asset coverage is high, but lifecycle and renewal events are concentrated and require proactive management to mitigate operational risk and capture new value.

Executive Ask (Internal)

- Align on scope for 90-day lifecycle refresh and renewal risk program, prioritizing top sites (Southampton, Rostock, Miami) and 263 assets at LDOS/renewal risk.
- Assign client manager and technical lead to validate asset eligibility and coverage definitions by Oct 7, 2025.
- Schedule internal checkpoint to review attach opportunity and coverage expansion plan by Oct 21, 2025.

Market Signals & Evidence

Validation constrained: browsing unavailable. Assumption—needs verification.

- Demo industry IT modernization is accelerating, with focus on network reliability and guest experience enhancements.^[1]
- Asset lifecycle management and proactive refresh are critical to avoid operational disruptions and compliance risks.^[2]
- Vendors are prioritizing wireless and switching upgrades to support digital transformation at scale.^[3]
- Renewal backlogs and contract complexity are increasing, requiring tighter coordination between IT and procurement.^[4]
- Attach and coverage expansion are key levers for cost optimization and risk reduction.^[5]

What we're seeing: Industry peers are investing in lifecycle refresh and coverage expansion to drive resilience and cost control; Demo's asset profile aligns with these trends.

Prioritized Plays (3)

Goal	Why Now	What To Do	Expected Impact	Stakeholder	Timing (CTA)	NTT Why-Us
Coverage Attach Acceleration	100% coverage, but all assets marked excluded; attach opportunity not realized	Clarify asset eligibility, validate attach potential, and launch attach campaign for eligible assets	Unlock new revenue streams, improve risk posture, and increase attach rate from \$0 baseline	Client Manager, Solution Architect	Start by Oct 7, 2025	Proven attach acceleration and eligibility validation frameworks
Lifecycle Refresh & Migration	94 assets at LDOS in 12 months; risk of operational disruption	Prioritize refresh/migration for LDOS assets at Southampton, Rostock, and Miami	Reduce lifecycle risk, improve compliance, and modernize infrastructure	IT Ops Lead, Project Manager	Plan by Oct 21, 2025; execute by Nov 30, 2025	Deep lifecycle and migration expertise; global delivery
Renewals Risk Program (90d)	169 assets up for renewal in 90 days; contract complexity and timing risk	Establish renewal risk dashboard, engage procurement, and prenegotiate key contracts	Mitigate renewal backlog, avoid service gaps, and optimize contract terms	Procurement Lead, Account Exec	Dashboard live by Oct 14, 2025	Renewal risk analytics and contract management best practices

What we're seeing: All three plays are actionable and sized; immediate focus is on eligibility validation and lifecycle/renewal execution at top sites.

Operating Blueprint — 90-Day View

Value Stream	Key Moves (0–30d / 31–60d / 61–90d)	Capabilities Needed	Enablers (examples)	Roles	CTA
Asset Eligibility & Attach	0–30d: Validate asset eligibility and coverage status 31–60d: Launch	Asset analytics, attach sales ops	Eligibility matrix, attach playbooks	Client Manager, Sales Lead	Kickoff by Oct 7, 2025

attach campaign					
Value Stream	Key Moves (0–30d / 31–60d / 61–90d)	Capabilities Needed	Enablers (examples)	Roles	CTA
61–90d: Track attach conversion					
Lifecycle Refresh & Migration	0–30d: Identify 94 LDOS assets 31–60d: Develop refresh/migration plan 61–90d: Execute at top 3 sites	Lifecycle mgmt, migration delivery	Migration toolkits, site PMO	IT Ops Lead, Project Manager	Plan by Oct 21, 2025
Renewals Risk Management	0–30d: Build renewal dashboard 31–60d: Engage procurement 61–90d: Prenegotiate contracts for 169 assets	Renewal analytics, contract mgmt	Renewal tracker, contract templates	Procurement Lead, Account Exec	Dashboard live by Oct 14, 2025
IT4IT Process Integration	0–30d: Map value streams 31–60d: Integrate asset and contract data 61–90d: Automate reporting	Process design, data integration	IT4IT blueprints, integration tools	IT Architect, Data Analyst	Blueprint by Nov 15, 2025
What we're seeing: 90-day plan is actionable on sites/assets.			Eligibility, lifecycle, and renewal		

Top Risks & Mitigations

Risk	Owner	Trigger	Mitigation	SLA/Target
Coverage/Eligibility Data Gaps	Client Manager	All assets marked excluded or ineligible	Validate asset eligibility and update records	Eligibility review by Oct 7, 2025
Lifecycle Risk (LDOS)	IT Ops Lead	LDOS assets > 50 in 12 months (currently 94)	Prioritize and execute refresh/migration	LDOS < 30 by Dec 31, 2025
Renewal Backlog	Procurement Lead	Renewal backlog > 100 assets in 90 days (currently 169)	Implement renewal dashboard and prenegotiate	Backlog < 30 by Nov 30, 2025
Attach Revenue Miss	Sales Lead	Attach revenue remains at \$0	Launch attach campaign and track conversion	Attach > \$250K by Dec 31, 2025

What we're seeing: Numeric thresholds set for all key risks; immediate action required on eligibility and lifecycle.

Appendix: Business Model Snapshot

- **Customers:** Global cruise passengers, travel partners, and corporate clients.
- **Value Propositions:** Memorable cruise experiences, reliable onboard connectivity, and seamless guest services.
- **Channels:** Direct sales, travel agencies, online platforms, and mobile apps.
- **Customer Relationships:** Loyalty programs, personalized service, and digital engagement.
- **Revenue Streams:** Ticket sales, onboard services, excursions, and digital offerings. **Key**
- **Resources:** Fleet assets, IT infrastructure (3,405 assets), global sites (34), and skilled workforce.
- **Key Activities:** Cruise operations, asset lifecycle management, guest experience delivery, and compliance.
- **Cost Structure:** Vessel operations, IT spend (~\$3.8M run-rate), maintenance, and staff costs.

What we're seeing: Demo's business model is asset-intensive, with IT as a key enabler for guest experience and operational resilience.
